

Wang Yibiao

Post-Quantum Cryptography / Secure Protocols / Engineering

Experience

2025-present | China Telecom Quantum Group: post-quantum cryptography and secure protocols.

2022-2025 | Shandong University: master's studies in cybersecurity.

2018-2022 | Shandong University: bachelor's studies in cybersecurity.

Engineering interests

TLS, TLCP, SSH and IKE: hybrid key establishment, cryptographic agility, interoperability and performance evaluation.

Algorithm libraries, implementation testing, interfaces and cross-platform integration.

Public projects

Cryptography Lab: 3 NIST-standard algorithms and 18 parameter combinations. A public catalogue covers 119 domestic submission candidates and 586 parameter instances; actual availability is recorded per instance.

Algorithm Guide: ML-KEM, ML-DSA, SLH-DSA and FN-DSA, with dedicated pages for mathematical principles, parameter sizes and primary sources.

Yibiao website: an open-source personal engineering, learning and news website.
